

Cat Islands Magical Stick

By Landon Anthis

Once upon a time there was a cat island with lots of different habitats. There were lots of different cats on this island. There was a tiger, lion, jaguar, leopard, cougar, cheetah.

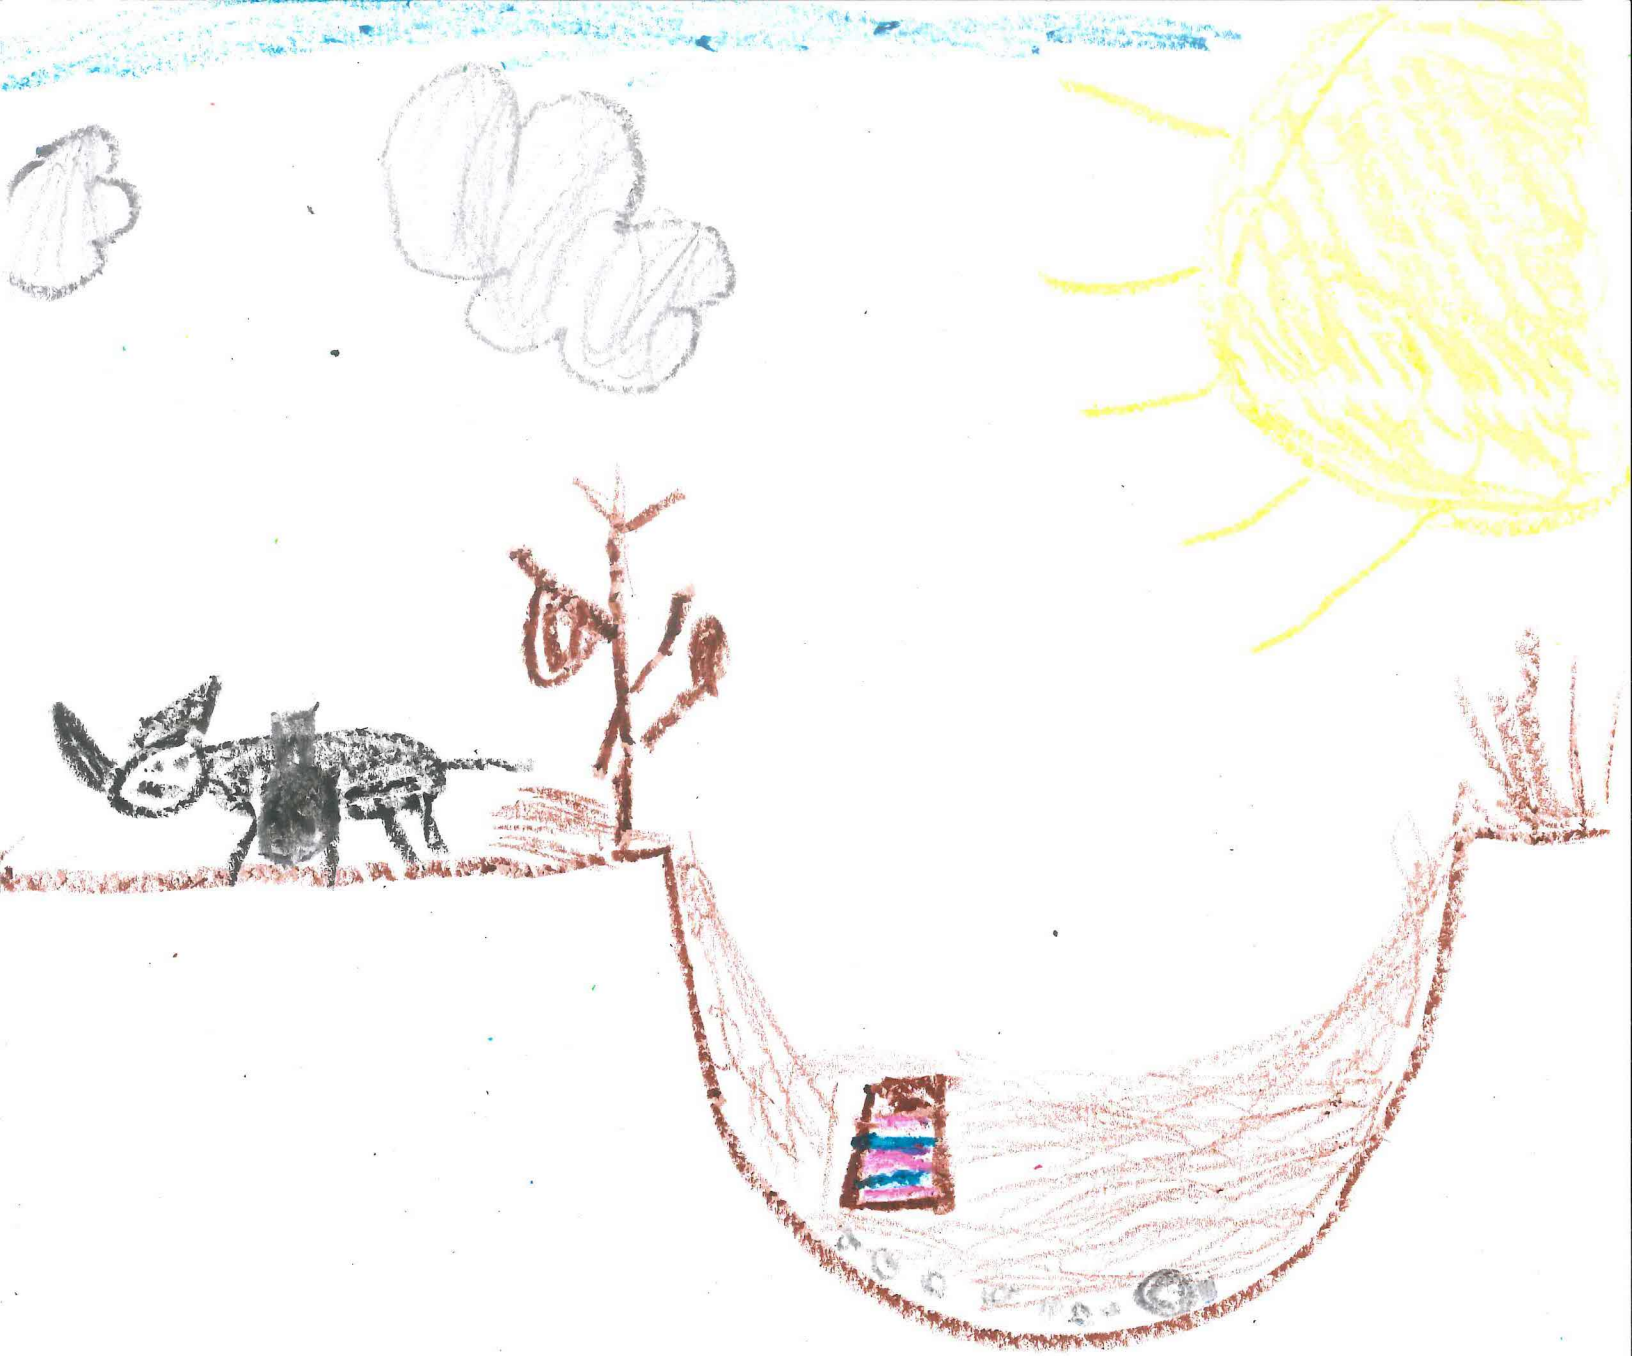

Magic Stick

One day cougar found a stick that looked magical. Soon the cats discovered that the stick made more land. Then they made their habitats 4 times bigger.

The next few days there was a drought. During the drought the plants dried up. The next day jaguar got the magic stick from cougar and put it in a sack for his meeting with his friends.

As jaguar was running to meet his friends the magic stick fell out of the sack and rolled into a hole. The next day the cat's land started to shrink but the stick was lost.

Cheetah was running to meet his friends and he fell into a hole and found the magic stick. Then cheetah used the magic stick to get to the high grounds and cheetah got to his friends.

He gave the magic stick to lion and tiger and they built the island 8 times bigger so they could have more food and plants to stay alive.
